

Nominate a special science teacher for  
Utah Museum of Natural History  
*Science Educator of the Year Award*

*Sponsored by the  
Sorenson Legacy Foundation*

The Museum will honor three exceptional educators in science...those whose influence may lead to an amazing career in a scientific field for one or more students. Each educator will receive a prize of One Thousand Dollars (\$1,000.00). A luncheon event honoring the winning educators will be held on November 17 at the Marriott City Center.

Honoring those who teach science is a “natural” for the Museum. For over thirty years, education has been at the heart of the Museum’s mission. UMNH, using its collection of over a million objects and its outstanding staff of scientists and educators has many strong science education programs including Junior Science Academy, Scientist in the Classroom, Museum on the Move, Youth Teaching Youth, an extensive array of summer camp programs, and ongoing adult programming. These programs are held both at the Museum and in schools and communities statewide, serving tens of thousands of students annually.

We hope you will join us by nominating one of your favorite teachers for *Science Educator of the Year*. All nominations are due October 10, 2005 and will be reviewed by a qualified board of judges. You will be advised of the results no later than October 25, 2005. Please follow the directions provided in the nomination form carefully. All of us at the Museum are excited to provide a public forum in which the great contribution of Utah’s science educators can be recognized.

*Utah Museum of Natural History Science Educator Awardees for 2004*
